

MODULAR CONFIGURABLE LOCKER SYSTEM

Modular locker systems use standardized, stackable components that combine to create mixed-tier, mixed-width installations tailored to each facility unique storage requirements.

SPECIFICATIONS

System Type:	Modular stackable, gangable comp	Module Widths:	12", 15", 18" (grid-aligned)
Module Heights:	12", 18", 24", 36", 72" per module	Module Depth:	15", 18", 21"
Stack Height:	Up to 78" total (modules + base + cap)	Body Material:	16-gauge cold-rolled steel
Finish:	Thermoset powder coat consistent	Connection:	Bolt-through ganging; stack with alignment pi
Lock Options:	Per-module: padlock, combo, electronic	Accessories:	Base units, top caps, end panels, fillers
Warranty:	15-year limited warranty		

KEY FEATURES

- Standardized module sizes on a dimensional grid system
- Mix different heights and widths in the same installation
- Modules stack vertically full-height, half-height, third-height
- Side-by-side ganging with flush alignment hardware
- Reconfigure installations as needs change over time
- Add modules to expand existing installations
- 16-gauge steel with consistent finish across all modules
- Each module is independently lockable
- Base and top cap modules for finished appearance
- Planning tool available for custom layout design
