

OUTDOOR WEATHERPROOF LOCKER

Galvanized steel and weather-sealed construction protect stored contents from rain, snow, UV exposure, and temperature extremes in fully outdoor locker installations.

SPECIFICATIONS

Body Material:	Hot-dip galvanized steel 16-gauge	Finish:	UV-stabilized thermoset powder coat
Weather Seal:	Continuous neoprene full door perimeter	Fasteners:	Type 304 stainless steel
Widths:	12", 15", 18"	Depths:	15", 18", 21"
Heights:	72", 78"	Tiers:	Single, Double, Triple, Box
Temp Range:	-40°F to 140°F operating	Mounting:	Concrete anchor system (hardware included)
Lock Options:	Weather-sealed padlock hasp, electronic	Warranty:	15-year structural against corrosion perforation

KEY FEATURES

- Hot-dip galvanized steel body and doors
- UV-stabilized outdoor-grade powder coat finish
- Continuous neoprene weather seals on all door frames
- Downward-facing ventilation louvers block water entry
- Overhanging top panel creates drip edge
- Weather-protected lock interface with hinged cover
- Stainless steel fasteners throughout no carbon steel
- Concrete anchor bolt system for wind resistance
- Operating range: -40°F to 140°F
- Available in free-standing or wall-mounted configurations
