

QUIET-CLOSE PREMIUM LOCKER

Engineered with soft-close hinges, sound-dampening gaskets, and vibration-absorbing materials, quiet-close lockers reduce operational noise by up to 70% for noise-sensitive facilities.

SPECIFICATIONS

Noise Reduction:	~70% vs. standard steel lockers	Damper Type:	Hydraulic soft-close, adjustable speed
Damper Rating:	100,000+ cycle lifespan	Gasket Material:	Closed-cell neoprene, full perimeter
Body Material:	16-gauge cold-rolled steel	Widths:	12", 15", 18"
Depths:	12", 15", 18", 21"	Heights:	60", 66", 72", 78"
Tiers:	Single, Double, Triple, Box	Finish:	Thermoset powder coat â€" 40+ colors
Lock Options:	All standard types including electronic	Warranty:	15-year structural, 5-year damper mechanism

KEY FEATURES

- Soft-close hydraulic door dampers on every door
- Sound-absorbing gaskets on full door perimeter
- Internal vibration-dampening panels on body walls
- Approximately 70% noise reduction vs. standard lockers
- Cushioned latch engagement eliminates click-clang
- Rubber bumpers at all metal-to-metal contact points
- Premium 16-gauge steel â€" structural integrity maintained
- Damper mechanism rated for 100,000+ cycles
- Available in all configurations and color options
- Ideal for noise-sensitive healthcare and academic settings
