

RECYCLED STEEL ECO LOCKER

Eco lockers manufactured from minimum 50% post-consumer recycled steel support LEED certification goals and institutional sustainability mandates without compromising performance.

SPECIFICATIONS

Recycled Content:	Minimum 50% post-consumer recycled steel	Certification:	Third-party verified material certificates
Finish:	Zero-VOC thermoset powder coat	Emissions:	Meets CDPH Standard Method v1.2 (LEED compliant)
Body Material:	16-gauge cold-rolled steel (recycled content)	Widths:	9", 12", 15", 18"
Depths:	12", 15", 18", 21"	Heights:	60", 66", 72", 78"
Tiers:	All standard configurations	Colors:	40+ standard powder-coat colors
End of Life:	100% recyclable steel body	Documentation:	EPD, material certs, LEED submittal letter
Warranty:	15-year limited warranty		

KEY FEATURES

- Minimum 50% post-consumer recycled steel content
- Verified by third-party material certification
- Zero-VOC powder-coat finishing process
- No measurable VOC emissions in service
- 100% recyclable at end of life
- Contributes to LEED MR Credit 4 (Recycled Content)
- Contributes to LEED IEQ Credits (low-emitting materials)
- EPD (Environmental Product Declaration) available
- Same structural performance as standard steel lockers
- Full color, configuration, and lock options available
